SUMMARY

Computer Science engineer (B.Tech CSE, VIT) currently building full-stack product features at Astra, a career-prep platform for Indian students (Next.js 16, React 19, Supabase/PostgreSQL), including a new recruiter-facing area built end to end (UI, data model, and backend logic). Prior experience shipping production features on YES Bank's OMNI trading platform, serving 20,000+ daily trades. Also builds AI agent tooling on the side: a GraphRAG memory layer for AI coding agents (CodeGraph) and a live product with multi-provider LLM routing (JobHuntPro). IIT Madras Global Hyperloop DesignX winner; Flipkart GRiD 7.0 national semifinalist.

EXPERIENCE

Astra  Sep 2026 – Present
Product Engineer Bengaluru, India (On-site)

- Full-stack developer across job/internship discovery, campus placement prep, question banks, AI-powered resume/GitHub/portfolio analysers, and a company map, on Next.js 16 (App Router) / React 19 / TypeScript with Supabase (PostgreSQL, Auth, Row-Level Security) as the backend, deployed on Vercel.
- Building a new recruiter-facing area end to end: hiring-manager workspace, candidate panel, and a public candidate portfolio page, backed by a typed service layer, a multi-tenant data model, and a consent-gated messaging flow.

YES Securities (YES Bank) Jan 2026 – Aug 2026
Full Stack Developer Intern Bengaluru, India

- Shipped 5+ production features (React, Node.js, REST APIs) on the OMNI trading platform serving 20,000+ daily trades; refactored backend microservices, cutting average API latency ~25%.
- Diagnosed N+1 query bottlenecks and redesigned database schemas, cutting query time ~35%; streamlined CI/CD across 3 backend microservices.

PROJECTS

CodeGraph: GraphRAG Memory Layer for AI Coding Agents | GitHub 2026 – Present

- Local-first memory and retrieval layer for AI agents: DuckDB entity/edge graph, 9-language parsing (tree-sitter), semantic embeddings fused with literal search via Reciprocal Rank Fusion, exposed as a 9-tool API over MCP; cuts agent context usage 9.6x.

JobHuntPro: Browser Extension + Web Platform | Live 2026 – Present

- Full-stack, AI-native product shipped to real daily use: a Chrome extension paired with a React dashboard, a Node/Express API, and a multi-provider LLM routing engine (Claude, Gemini, OpenRouter) with automatic fallback.

EDUCATION

Vellore Institute of Technology 2022 – 2026
B.Tech, Computer Science & Engineering Vellore, Tamil Nadu, India

ACHIEVEMENTS

Winner: Global Hyperloop Competition (Asia's First), IIT Madras 2025

- AI & Software Lead, Team Levitate (VIT): led the software workstream within a cross-functional engineering team under competition deadlines; team won the DesignX trophy and 5 category awards against 15+ international teams.

National Semifinalist: Flipkart GRiD 7.0 2025

SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Redux

Backend & Data: Node.js, Express.js, FastAPI, Supabase, PostgreSQL, MongoDB, Row-Level Security, REST APIs

AI: LLM APIs (Claude, Gemini), Vercel AI SDK, MCP, Prompt Engineering, AI Coding Assistants

Tools: Git, Vercel, CI/CD, Agile, Data Structures & Algorithms
